Institute of Analysis and Number Theory

Austrian-Russian Mini-Symposium on Diophantine Approximation

18.12.2018, 11:00

Seminarraum Analysis-Zahlentheorie, Kopernikusgasse 24, 2.OG

Parametric geometry of Nepal

ANTOINE MARNAT

(TU Graz)

In this talk, we discuss recent results concerning spectra of exponents of Diophantine approximation. Weighted homogeneous-inhomogeneous transferences, and joint spectra of an exponent and its uniform counterpart. Included are some recent pictures of the Himalayas.

Ch. Aistleitner
